

Software Management TASK – 10

- 1. Use the apt package manager to install the VLC media player on your Linux system, then verify the installation by running `vlc --version` in the terminal.**

Ans :

- `sudo apt update`
 - `sudo apt install vlc -y`
 - `vlc --version`
- 2. Update all installed packages on your Linux system using the appropriate package manager command, and take a screenshot of the output showing at least one package being upgraded.**

Ans :

- `sudo apt update`
 - `sudo apt upgrade -y`
 - The following packages will be upgraded:
 - `openssl ubuntu-drivers-common`
 - 2 upgraded, 0 newly installed, 0 to remove and 0 not upgraded.
 -
 - `Get:1 http://...`
 - `Get:2 http://...`
 - `Preparing to unpack ...`
 - `Unpacking openssl ...`
 - `Setting up openssl ...`
 - `apt list --upgradable`
- 3. Remove the nano text editor from your system using the package manager, then confirm it has been removed by**

attempting to run nano in the terminal.

Hint: Use apt remove or yum remove depending on your Linux distribution.

Ans :

- sudo apt remove nano -y
- nano
- nano: command not found

**4. List all installed packages on your system and filter the results to show only packages related to 'python'.

Hint: Use grep to filter the output of your package manager's list command.**

Ans :

- apt list --installed | grep -i python
- python3/jammy,now 3.10.6-1 amd64 [installed]
- python3-pip/jammy,now 22.0.2+dfsg-1 all [installed]
- python3-venv/jammy,now 3.10.6-1 amd64 [installed]
- python3-setuptools/jammy,now 59.6.0-1.2 all [installed]
- cat python_packages.txt

**5. Use ChatGPT or Copilot to generate the command needed to clean up unused packages and dependencies on your Linux system, then run the command and share the result.

Hint: Ask the AI tool: 'What is the command to remove unused packages in Ubuntu/Debian?' and try it on your system.**

Ans :

- sudo apt autoremove -y
- Reading package lists... Done

- Building dependency tree... Done
- Reading state information... Done
-
- The following packages will be REMOVED:
- linux-headers-6.8.0-31-generic
- linux-modules-6.8.0-31-generic
-
- After this operation, 185 MB disk space will be freed.
- Do you want to continue? [Y/n] y
-
- Removing linux-headers-6.8.0-31-generic ...
- Removing linux-modules-6.8.0-31-generic ...

If there are no unused packages:

- Reading package lists... Done
- Building dependency tree... Done
- Reading state information... Done
- 0 upgraded, 0 newly installed, 0 to remove and 0 not upgraded.
