

Job Automation With Cronjobs TASK – 9

- 1. Create a cronjob that runs every day at 8:00 AM and appends the current date and time to a file named mylog.txt in your home directory.**

Ans :

- crontab -e
 - 0 8 * * * date >> ~/mylog.txt
- 2. Set up a cronjob to back up a folder named 'music' from your Downloads directory to a 'backup_music' folder inside your Documents every Sunday at 11:30 PM.**
Hint: Use the cp -r command in your cronjob.

Ans :

- crontab -e
 - 30 23 * * 0 cp -r ~/Downloads/music
~/Documents/backup_music
- 3. Write a cronjob that deletes all .tmp files from your Desktop every hour and logs the deleted filenames to a file called deleted_tmp.log.**

Ans :

- crontab -e
 - 0 * * * * find ~/Desktop -type f -name "*.tmp" -print -delete
>> ~/deleted_tmp.log 2>&1
- 4. Temporarily disable a cronjob that prints 'Time for a break!' every 2 hours, without deleting the job. Then, re-enable it after 5 minutes.**
Hint: Use the

comment (#) character to disable and enable lines in your crontab.

Ans :

- crontab -e
- # 0 */2 * * * echo "Time for a break!"
- sleep 300
- crontab -e
- 0 */2 * * * echo "Time for a break!"
- # 0 */2 * * * echo "Time for a break!"
- 0 */2 * * * echo "Time for a break!"

5. Use ChatGPT or another AI tool to generate a cron expression for running a script every weekday at 7:45 PM, then test it by creating a cronjob that echoes 'Dinner Reminder' into dinner.txt at the scheduled time.

Ans :

- crontab -e
- 45 19 * * 1-5 echo "Dinner Reminder" >> ~/dinner.txt
